EXPERIENCE

Full Stack Developer

August. 2022 – February 2026

Infinite Fusion Tech Ltd | Qormi, Malta (Remote)

- Collaborated with cross-functional teams to ensure that applications were deployed efficiently and maintained at high standards in production environments.
- Developed web and mobile applications using React, Django and Ionic framework for both frontend and backend.
- Documented the entire development lifecycle, including architecture and best practices, to ensure consistency across projects.
- Contributed to full-stack development in a collaborative product team, focusing on user experience and delivering scalable solutions for customer-facing applications.
- Conducted code reviews to ensure best practices, maintainability, and high-quality code, fostering a collaborative and growth-focused environment within the development team.

PERSONAL PROJECTS ([GitHub](#))

Palette Selector - ([link](#))

March. 2026 – Present

- Django web app for generating color palettes from images, live websites (headless Chromium via Playwright), and 26 HSL-defined color moods.
- Includes WCAG contrast checker, colorblind simulation, lock-and-regenerate, saved favorites with auth, and an SSRF guard on the URL extractor.

App Blocker - ([link](#))

May. 2026 – Present

- React Native (Expo) Android app & website blocker backed by a custom native Kotlin module that intercepts app launches and browser URLs in real time using Android accessibility and foreground services.
- Includes a composable rule engine (time, daily usage limits, geofencing, Wi-Fi/SSID, and task-completion gates), a strict mode that requires transcribing a randomized pledge verbatim to bypass, goal tracking with streaks, and a token-authenticated Django REST backend.

EDUCATION

University of Cyprus | Bachelor of Electrical and Computer Engineering (Computer Engineering)

2017-2022

- GPA: 7.2/10
- Specialized in Intelligent systems, Control and Robotics
- Thesis: “Crowdsourced indoor localization with Bluetooth signals” | I was in charge of the coding of receiving Bluetooth signals and positioning the user by using machine learning methods in an already existing app. All coding was made in Android Studios.

SKILLS

- Mobile: React Native | Expo | Kotlin (native modules) | Android SDK | Ionic
- Languages: Python | JavaScript | TypeScript | Kotlin | SQL | Java | C/C++
- Frameworks & Backend: Django | Django REST Framework | FastAPI | Next.js | React | Angular
- Android Native: Accessibility Services | Foreground Services | Android Studio
- Tools & Automation: Playwright | Git | Firebase | REST API design | Token authentication
- Concepts: Machine Learning | Web security (SSRF mitigation) | WCAG/accessibility
- Languages (spoken): Greek (Native) | English (IELTS 6.5)

ADDITIONAL INFORMATION

Certificates:

- ECDL
- Delf A1 & A2
- JA Finalist (2021)
